RVLogin

UNLOCK
The way you manage your server admins' access.

A Shield Guard for WHM/SSH Single Sign-on

RVLogin is a tool for your WHM & SSH Single-sign on to hundreds or thousands of your servers. With RVLogin, you will have one access to manage and administer your servers with ease under highly secured environment. In combination with RV2Factor, a 2-factor authentication for truly web-hosting business, the RVLogin will provide you an identity-based authentication that prevents your servers from any kinds of latest attacks to your server. Once you set up you SSH Gateway Server, RVLogin is a one single place that you and your server admin teams will be able to harness all difficulties in accessing multiple servers in your facilities or datacenters.

Unified Gateway and Access
Whether for WHM or SSH Servers, your access to multiple servers is still controlled, managed, and ministered through one single sign-on tool. This RVLogin's engine is based on your compliance policy, enabling your control over admin's access to any server in your facilities or organizations.

Advanced Security
With WHM Server access, you will benefit from RVLogin as a single sign-on tool. However, RV2Factor will work to enhance your access with more advanced security from 2-Factor Authentication. With SSH Server access, RV2Factor will do authenticate your admins accessing via SSH. So, do use RVLogin with RV2Factor to enhance your secure access.

Dynamic Control
With WHM/SSH Server Gateway, you are able to monitor and control every in and out to your multiple servers in control. You can manage existing admins or new admins alike with credential-based authentication from RV2Factor's engine which is totally compatible with RVLogin.
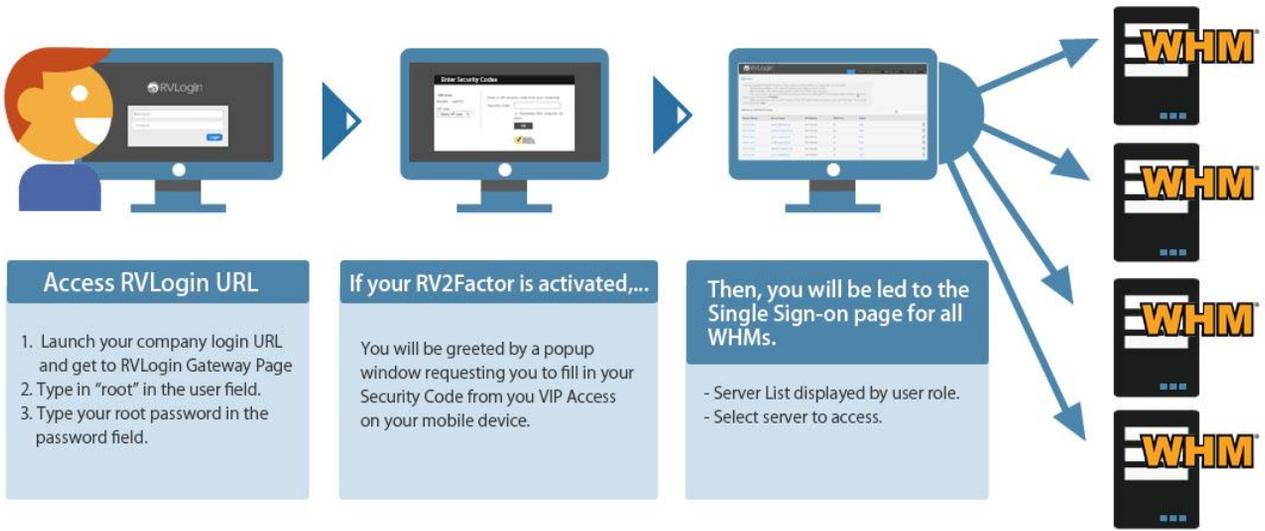

Fewer Costly Hours
RVLogin is a life-time free for all servers, admins, or hours of use. No license fees or subscription payments are required. Once implemented, your control over multiple access needs just a few minutes to set up and handle. With your purchases of RV2Factor, your RVLogin will reduce more hours of your server admins.

RV GLOBALSOFT

RVLogin

RVLogin provides a single sign-on for WHM. To use it, you must assign one gateway server for your login URL. With RV2Factor, your system will be 100% secured with single sign-on and 2-factor authentication.

RVLogin for WHM Single Sign-on

Create a Single Sign-on page for all WHMs and secure your access of individual users by RV2Factor. Without RV2Factor, you can still use RVLogin to do a single sign-on to all of your WHMs, but it is not recommended.

Access RVLogin URL

1. Launch your company login URL and get to RVLogin Gateway Page
2. Type in "root" in the user field.
3. Type your root password in the password field.

If your RV2Factor is activated,...

You will be greeted by a popup window requesting you to fill in your Security Code from you VIP Access on your mobile device.

Then, you will be led to the Single Sign-on page for all WHMs.

- Server List displayed by user role.
- Select server to access.

RVLogin can be used for your SSH single sign-on. To implement it, you must also assign one gateway server for your login. RV2Factor is required if you want to use this function of RVLogin for SSH access.

RVLogin for SSH Single Sign-on

Creating a Single Sign-on for your SSH access is required RV2Factor for your individual users. If you already have RV2Factor account, this should be easy.

Login to RVLogin Gateway.

You are required to authenticate yourself in the SSH access.

When RV2Factor is activated, ...

You have to select your RV2Factor account and supply your Security Code from your VIP Access on your mobile device.

If you don't have RV2Factor,.... you will be led to an order page to purchase the RV2Factor account.

Then, you will be led to the Single Sign-on page for all SSHs.

If you are verified by RV2Factor, you will be able to access any SSH you want.

RV GLOBALSOFT

Once, you download RVLogin, you will be able to use it for WHM single sign-on and SSH single sign-on. With RVLogin's engine inside, your servers will be managed and controlled. Yet, RV2Factor helps secure your access via VIP Access mobile applications on your server admin's device.

RVLogin for WHM and SSH Single Sign-ons

Single Gateway Portal for Server Admins to login.

Server Admins get a web access to all WHMs and SSHs.

RV2Factor for your user authentication.

Verify and authorize your users via VIP Access on their personal mobile device.
